Re: Approved Paints for Schutt Football and Baseball Helmet Shell

The following is a list of approved paints for use on all Schutt Sports Baseball and Football helmet shells with the exception of models that have "DO NOT PAINT" labeling on the exterior of the shell. Shells labeled in this manner should not be painted.

1. COLOR-SET, INC.
(acrylic lacquer)
Contact: Walter Trobovic (610.258.8463)
2. WURDACK, INC.
(acrylic lacquer)
Contact: Bill Wurdack (314.351.6600)
3. SHERWIN WILLIAMS CORP.
(Krylon Interior/Exterior Enamel) – approved for touch-up and clear top coats.
Contact: Most discount department stores.
4. AKZO/SIKKENS
(Autocryl acrylic urethane paint system)* Requires AKZO "Color-Build" Filler as Primer.
(U-Tech #3.8 two part urethane paint system)* One step application.
(U-Tech #460 two part urethane paint system)* Requires "Lesonal" brand clear-coat as top coat.
Contact: Local automotive paint supplier.
5. DuPont Corp.
(Chroma-1, acrylic urethane paint system)* Requires AKZO "Color-Build" Filler as Primer.
Contact: Local automotive paint supplier.
6. CREATEX BRAND
(water-based, Airbrush paint)
Contact: Local Art supply stores.

It is strongly recommended that the above listed paint systems be applied by Schutt Sports Mfg. Co. or one of its approved NAERA member reconditioners, in that application of the paints and primers by a very specific procedure is required. The location of an approved reconditioner can be obtained through Schutt Sports Customer Service Department.

*The Autocryl, U-Tech, and Chroma-One systems contain Isocyanates and require a self-contained breathing apparatus while applying.

Larry F. Maddux
